Early Human Development, 21 (1990) 199—200
Elsevier Scientific Publishers Ireland Ltd.

Subject index

alternative birth center, breast feeding, birth place, social group, influence of staff, 115
amnionitis, complement system, preterm infants, respiratory distress syndrome, Wilson-Mikity syndrome, intrauterine growth retardation, 59

birth place, breast feeding, alternative birth center, social group, influence of staff, 115
body composition, infants, skinfolds, 193
brain damage, growth retardation, hypoxia-ischemia, perinatal, rat, 165
breast-feeding, early suckling, maternal attachment, maternity care, neonates, gastrin, prolactin, 153
breast feeding, alternative birth center, birth place, social group, influence of staff, 115
bronchopulmonary dysplasia, growth, premature infant, 83

caesarean delivery, psychological outcome, mother, child, four-year follow-up, 105
carbon dioxide production, skin, percutaneous respiration, respiration, skin permeability, 93
child, caesarean delivery, psychological outcome, mother, four-year follow-up, 105
complement system, preterm infants, amnionitis, respiratory distress syndrome, Wilson-Mikity syndrome, intrauterine growth retardation, 59
cytomegalovirus, microglial nodules, sudden infant death syndrome, 31

diuresis, preterm, respiratory distress syndrome, natriuresis, sodium balance, 11
doppler, fetal breathing, umbilical vein, fetus, respiratory movements, 181
Doppler ultrasound, heart rate, fetal, 21

early suckling, breast-feeding, maternal attachment, maternity care, neonates, gastrin, prolactin, 153
ECW, postnatal weight loss, TBW, PV, negriod neonates, 73

fetal, Doppler ultrasound, heart rate, 21
fetal breathing, doppler, umbilical vein, fetus, respiratory movements, 181
fetal breathing, fetal thoracic circumference, fetal lung area, oligohydramnios, pulmonary hypoplasia, 143
fetal breathing movements, pulmonary hypoplasia, oligohydramnios, premature rupture of the membranes, 41
fetal lung area, fetal breathing, fetal thoracic circumference, oligohydramnios, pulmonary hypoplasia, 143
fetal lung development, type IV collagen, lung hypoplasia, oligohydramnios, 175
fetal thoracic circumference, fetal breathing, fetal lung area, oligohydramnios, pulmonary hypoplasia, 143
fetus, somatomedins, insulin-like growth factors, 49
fetus, respiratory movements, fetal breathing, doppler, umbilical vein, 181
four-year follow-up, caesarean delivery, psychological outcome, mother, child, 105

gastrin, breast-feeding, early suckling, maternal attachment, maternity care, neonates, prolactin, 153
growth, bronchopulmonary dysplasia, premature infant, 83
growth retardation, brain damage, hypoxia-ischemia, perinatal, rat, 165

heart rate, Doppler ultrasound, fetal, 21
hypoxia-ischemia, brain damage, growth retardation, perinatal, rat, 165

infants, body composition, skinfolds, 193
influence of staff, breast feeding, alternative birth center, birth place, social group, 115
insulin-like growth factors, somatomedins, fetus, 49
intrauterine growth retardation, complement system, preterm infants, amnionitis, respiratory distress syndrome, Wilson-Mikity syndrome, 59

lung hypoplasia, type IV collagen, fetal lung development, oligohydramnios, 175

maternal attachment, breast-feeding, early suckling, maternity care, neonates, gastrin, prolactin, 153
maternity care, breast-feeding, early suckling, maternal attachment, neonates, gastrin, prolactin, 153
microglial nodules, cytomegalovirus, sudden infant death syndrome, 31
mother, caesarean delivery, psychological outcome, child, four-year follow-up, 105

natriuresis, preterm, respiratory distress syndrome, diuresis, sodium balance, 11
negriod neonates, postnatal weight loss, TBW, ECW, PV, 73
neonates, breast-feeding, early suckling, maternal attachment, maternity care, gastrin, prolactin, 153
newborn intensive care, preterm, skin, scars, 1

oligohydramnios, type IV collagen fetal lung development, lung hypoplasia, 175
oligohydramnios, fetal breathing, fetal thoracic circumference, fetal lung area, pulmonary hypoplasia, 143
oligohydramnios, fetal breathing movements, pulmonary hypoplasia, premature rupture of the membranes, 41

perinatal, brain damage, growth retardation, hypoxia-ischemia, rat, 165
postnatal weight loss, TBW, ECW, PV, negriod neonates, 73
percutaneous respiration, skin, respiration, skin permeability, carbon dioxide production, 93
premature infant, bronchopulmonary dysplasia, growth, 83
premature rupture of the membranes, fetal breathing movements, pulmonary hypoplasia, oligohydramnios, 41
preterm, newborn intensive care, skin, scars, 1
preterm, respiratory distress syndrome, natriuresis, diuresis, sodium balance, 11
preterm infants, complement system, amnionitis, respiratory distress syndrome, Wilson-Mikity syndrome, intrauterine growth retardation, 59
prolactin, breast-feeding, early suckling, maternal attachment, maternity care, neonates, gastrin, 153
psychological outcome, caesarean delivery, mother, child, four-year follow-up, 105

pulmonary hypoplasia, fetal breathing, fetal thoracic circumference, fetal lung area, oligohydramnios, 143
pulmonary hypoplasia, fetal breathing movements, oligohydramnios, premature rupture of the membranes, 41
PV, postnatal weight loss, TBW, ECW, negriod neonates, 73

rat, brain damage, growth retardation, hypoxia-ischemia, perinatal, 165
respiration, skin, percutaneous respiration, skin permeability, carbon dioxide production, 93
respiratory distress syndrome, complement system, preterm infants, amnionitis, Wilson-Mikity syndrome, intrauterine growth retardation, 59
respiratory distress syndrome, preterm, natriuresis, diuresis, sodium balance, 11
respiratory movements, fetal breathing, doppler, umbilical vein, fetus, 181

scars, newborn intensive care, preterm, skin, 1
skin, newborn intensive care, preterm, scars, 1
skin, percutaneous respiration, respiration, skin permeability, carbon dioxide production, 93
skinfolds, body composition, infants, 193
skin permeability, skin, percutaneous respiration, respiration, carbon dioxide production, 93
social group, breast feeding, alternative birth center, birth place, influence of staff, 115
sodium balance, preterm, respiratory distress syndrome, natriuresis, diuresis, 11
somatomedins, insulin-like growth factors, fetus, 49
sudden infant death syndrome, cytomegalovirus, microglial nodules, 31

TBW, postnatal weight loss, ECW, PV, negriod neonates, 73
type IV collagen, fetal lung development, lung hypoplasia, oligohydramnios, 175

umbilical vein, fetal breathing, doppler, fetus, respiratory movements, 181

Wilson-Mikity syndrome, complement system, preterm infants, amnionitis, respiratory distress syndrome, intrauterine growth retardation, 59
